

# Hard Wire Curtain Track Motor (DT980TV/S) Wiring information.

The DT980TV/S Hard Wire Curtain Track motor is wired directly into the power supply using the Brown, Blue and Green/Yellow wires (please see above for wiring details).

*The White and Black wires are intended for use in an external switch or for hard wired home automation.*

*If not using the White or Black wires, please place a line cap on the end of each wire and/or insulate accordingly.*

All wiring should be undertaken and completed by a registered electrician.

Martec Distribution takes no responsibility for any wiring, any issues, problems or damage caused when wiring, or any issues problems or damage caused by incorrect wiring.
